

SEMS Goal #12

Advance a sustainable mission and Fort Carson by adopting a Sustainability and Environmental Management System (SEMS) and by imparting (passing on) a personal commitment and enthusiasm for sustainability

Questions:

How can Fort Carson better understand and address economy, social and well-being aspects and impacts in its SEMS?

How can Fort Carson better engage external stakeholders in order to build relationships, gather and share information, and enhance learning and innovation?

SEMS Training

Accomplishments:

- Prioritized Fort Carson sustainability aspects and impacts with Installation and community stakeholders.
- Presented SEMS Awareness Training to more than 14,000 Soldiers, civilians, contractors, family, and community members.
- Implemented an ISO-compliant SEMS website that enables information sharing and communication.

Future Initiatives:

- Complete an internal system audit and declare conformance with ISO 14001 standards.
- Update and refine 25-year goal plans, objectives, and targets.
- Initiate sustainability competence training for leaders, managers, and other decision makers.
